SEE IT. INSPECT IT. VERIFY IT.

BioGlo lamp with smart glasses and SpectraScope for visual hygiene verification.

Capabilities of the BioGlo Lamp and SpectraScope

Advanced microbial visualisation
Detects biofilm, bacterial colonies and hidden contamination

Spectral illumination technology
Specialised wavelengths highlight microbial activity and surface irregularities

Real-time inspection
Instant on-site detection without waiting for lab tests

High-precision 6mm head camera
Small enough to fit into pipes, ducts and other confined spaces

USB connectivity to smartphones and devices
Enables live monitoring and easy control in the field

DETECT CONTAMINATION.™ | TARGET ATP. | VERIFY CLEANING. | CAPTURE EVIDENCE.

BIOGLO WITH SMART GLASSES + SPECTRASCOPE

Visual hygiene verification in real time.
